- Certificate: SAS Advanced Programming Language Scientists Certificate.
- Language: Mandarin (native), English (fluent)

PROFESSIONAL EXPERIENCE

ICBC China	Suzhou, JiangSu, China
Manipulating and Analyze Data	**March 2023 – July 2023**

- In ICBC, I was responsible for manipulating the data provided by others and create a report based on cosumer's interest and the risk of fail for them not be able to repay their debt. I mainly used excel to work with the problem rather than more advanced coding program like R or SAS. But I would still use these programs to create graphs to do a further analyze on it. In this internship, I am able to familiar myself with the procedure of how bank run on daily basis and how they are going to access each member in the bank system.

ACADEMIC PROJECTS

Fire response time project, University of Toronto	Jan.20 – Feb.10, 2024

- I conducted a project based on open data from Toronto government where they have complete data on the fire receive time and arrive on site time. I am able to use these time to find out how long they took to arrive on scene.
- I found out that the it is true for people to say that fire response time is around 1.5 minutes no matter the distance.
